

Eyuel Wondimagegn

Full-Stack Developer (React, Node.js, TypeScript)

Addis Ababa, Ethiopia | eyuel.wondimagegn.dev@gmail.com | github.com/eyudevs
linkedin.com/in/eyuel-wondimagegn-381483336 | eyu.et

SUMMARY

Full-stack developer working in React, TypeScript, and Node.js. Built a team collaboration app, a production exam archive, an open-source component library, and three client platforms.

SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Backend and Databases: Node.js, Bun, Hono, Express, REST APIs, Socket.IO, PostgreSQL, Drizzle ORM, MongoDB, Redis

Frontend: React, Next.js, React Native, Expo, Tailwind CSS, TanStack Router and Query, Motion, Figma

Tools and Cloud: Git, GitHub, Docker, Cloudflare, Vercel, Render

AI and Automation: RAG, Vector Databases, OpenAI/Claude APIs, n8n

EXPERIENCE

Freelance Full-Stack Developer

Self-employed

Independent

2025 - Present

- Delivered 3 commercial client platforms for education, recruitment, and photography businesses.
- Built authentication, booking, and tracking features using React, Next.js, and Node.js.

Riser Technology & Services

Software Intern (Front-End)

Addis Ababa, Ethiopia (Hybrid)

Mar 2026 - Jun 2026

- Built responsive, component-driven layouts with React.js and Tailwind CSS alongside a development team.
- Translated Figma designs into production-ready interfaces that render consistently across screen sizes.

PROJECTS

[Coordinates](#)

2026

Team collaboration app (beta) | React Native (Expo), Express, MongoDB Atlas, Socket.IO, Better Auth

- Built a mobile-first app that joins team chat, task boards, sprints, and daily standups.
- Enforced workspace isolation with a tenant-scoped data layer and centralized Owner, Admin, and Guest permissions.
- Added Socket.IO realtime sync, an offline mutation queue, and Expo push notifications.

[AAU Exams](#)

2026

Production platform | React 19, TanStack Router, Bun, Hono, Drizzle ORM, Neon PostgreSQL, Cloudflare R2

- Architected a full-stack monorepo for a peer-driven exam archive, replacing scattered papers in chat groups.
- Used TanStack Router and Hono RPC for type-safe routing, with Drizzle ORM, Neon PostgreSQL, and Cloudflare R2.
- Built passwordless magic-link authentication restricted to @aau.edu.et accounts using Better Auth.
- Implemented client-side image-to-PDF compilation and Ghostscript PDF downscaling to reduce storage.

[Kewti Components & CLI](#)

2026

Open source | React, Next.js, TypeScript, Node.js, Tailwind CSS

- Built a themeable, accessible React component library for Ge'ez typography and Ethiopian calendar conversion.
- Designed a CLI (npx kewti-cli add calendar) that copies components into apps for full code ownership.

[Gitstreak](#)

2026

Mobile and web app | React Native, GitHub API

- Developed a React Native app with a 104-week GitHub contribution heatmap synced from the GitHub API.
- Added a friend streak board, 14 theme palettes, and iOS and Android home-screen widgets.

Docs RAG Agent

2026

AI integration | Node.js, Vector Database, OpenAI/Claude API

- Implemented chunking, embedding, and vector storage pipelines with LLM retrieval and conversational memory.

Client Platforms

2025 - 2026

Negus Consultants, Blue Employment, Vision Creative

- [Negus Consultants](#): built a scholarship and mentorship platform with a course system and scholarship tracker.
- [Blue Employment](#): built a recruitment placement portal with compliance briefs and clearance tracking.
- [Vision Creative](#): built a photography portfolio and booking platform with interactive pricing grids.

CERTIFICATIONS AND LEADERSHIP

Certifications: Harvard CS50 (edX); Data Structures and Algorithms (Nexus Tutorial); freeCodeCamp (Web Design, JavaScript)

1st Place, GDG AAU Hackathon 2026: Co-built the initial version of Kewti Components with two teammates.
